

> STOREMATE ORDER PICK&PAY

Order and delivery services at a higher level

Toshiba Order Pick&Pay (OP&P) is based on Toshiba's self-service vision and provides a solution to shops offering home delivery services.

Toshiba Order Pick&Pay integrates seamlessly into your existing POS environment. It features full POS functionality on top of the mobile application. All transactions are real-time, so that current promotions and price changes are processed immediately on the mobile hand scanner.

Toshiba Order Pick&Pay is a reliable and easy to use solution, fully integrated with customer management and invoicing.

TOSHIBA
Leading Innovation >>>

> STOREMATE ORDER PICK&PAY

Order Pick&Pay efficiently processes the customer orders and lends a helping hand to your staff to manage transactions effectively.

OP&P increases productivity and reduces errors thanks to the on-line price modifications or promotions via the real-time connection with the TOSHIBA TEC storeMate POS environment.

OP&P is also compatible with third-party software. You, as a retailer, have the freedom to organise this service to meet the needs of your retail operation.

> BENEFITS

Time-saving

You scan the articles straight from the shelves using the hand scanner, and pack them immediately in the box or crate for the customer. You finalise the order on the integrated POS environment, without interrupting the normal checkout process.

Quality Standards

The mobile application allows you to comply with strict quality guidelines such as HACCP.

Full integration with customer and invoicing modules

You register everything on the customer level; invoicing can be manual or automatic.

High Reliability

The Toshiba OP&P system is specifically designed to operate in the most demanding retail environments. Plug&Play in an existing storeMate environment, easily connected to third-party POS solutions.

Designed for Retail

Robust casing and user-friendly software for demanding retail environments.

storeMate Order Pick&Pay consists of best-of-breed components, such as:

- Toshiba WILLPOS B20
- Motorola MC-17
- DataLogic Magellan scanner
- storeMate software modules.

Process:

1. Receive customer order
2. Release terminal
3. Order picking and registration
4. End order
5. Register order on customer account
6. Delivery
7. Invoicing and payment.
